

CSE 391/591:
Computational Photography
and
Intro. to Computer Vision

www.cs.sunysb.edu/~cse591

Instructor: **Prof. M. Alex O. Vasilescu**

Email: **maov@cs.sunysb.edu**

Phone: **631 632-8457**

Office: **1421**

Traditional Computer Graphics

3D geometry

physics

projection

GRAPHICS

State of the Art

- Amazingly real
- But so sterile, lifeless, *futuristic (why?)*

The richness of our everyday world

Photo by Svetlana Lazebnik

People

From "Final Fantasy"

On the Tube, London

Faces / Hair

From "Final Fantasy"

Photo by Joaquin Rosales Gomez

Urban Scenes

Virtual LA (SGI)

Photo of I LA

Nature

River Cherwell, Oxford

The Realism Spectrum

Computer Graphics

- + easy to create new worlds
- + easy to manipulate objects/viewpoint
- - Very hard to look realistic

Computational Photography

Realism
Manipulation
Ease of capture

Photography

- + instantly realistic
- + easy to acquire
- - very hard to manipulate objects/viewpoint

Automatic Photo Pop-Up

Structure from Motion

(Tomasi and Kanade 1992)

Video

Features

3D Reconstruction

Photo Collections

Organize Photos

Panoramic imaging

Image and video registration

Spatial warping operations

Detect ground plane in video and introduce pictures on them

Insert new objects

Video example: <http://break.com/index/ufo-lands-on-guys-desk.html>

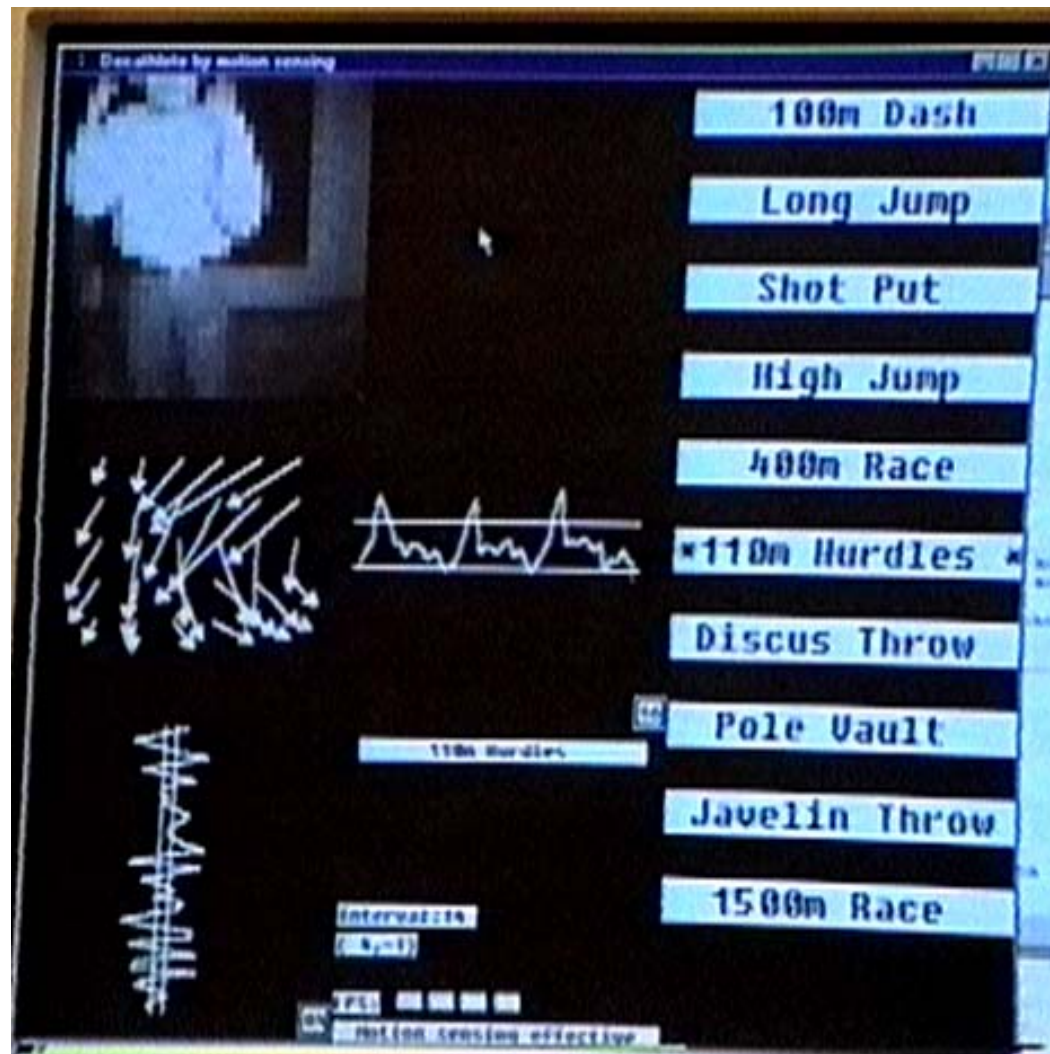

Video Summary

Game: Decathlete

Optical-flow-based Decathlete figure motion analysis

Decathlete javelin throw

Decathlete javelin throw

Decathlete 100m hurdles

Black or White

- **Face Detection**
- **Face Localization**
- **Segmentation**
- **Face Tracking**
- **Facial features localization**
- **Facial features tracking**
- **Morphing**

www.youtube.com/watch?v=ZI9OYMRwN1Q

General Comments

- **Prerequisites**

Linear algebra!!!

Some computer graphics, vision, or image processing is useful, but not required.

- **Emphasis on programming projects!**

Building something from scratch (Matlab!)

References

- There is no required text. Various course notes and papers will be made available. Furthermore, there is an optional textbook that you might find helpful. It will be placed on reserve at the Wean Hall library:
 - *Computer Vision: The Modern Approach, Forsyth and Ponce*
- There is a number of other fine texts that you can use for general reference:
 - *Photography (9th edition), London and Upton,*
 - *Vision Science: Photons to Phenomenology, Stephen Palmer*
 - *Digital Image Processing, 2nd edition, Gonzalez and Woods*
 - *Multiple View Geometry in Computer Vision, Hartley & Zisserman*
 - *The Computer Image, Watt and Policarpo*
 - *Linear Algebra and its Applications, Gilbert Strang*

Grading

	A	B
Problem Sets (~6) with lab exercises in Matlab. Problem sets may be discussed, but all written work and coding must be done individually.	30%	50%
One take-home exams. (Take-home exams may not be discussed.)	30%	0%
Class Participation	10%	10%
Final Project: –An original implementation of a new or published idea –A detailed empirical evaluation of an existing implementation of one or more methods Project proposal not longer than two pages must be submitted and approved before the end of October.	30%	40%

Administrative Stuff

- **Late Policy**

Seven late days total, to be spent wisely

- **Cheating**

Let's not embarrass ourselves

- **Software**

MATLAB!!!

Internet Resources

- **Matlab:**

- [University of Colorado Matlab Tutorials](#)

- A decent collection of Matlab tutorials, including one focusing on [image processing](#).

- [Matlab Image Processing Tutorial](#)

- A short introduction to the manipulation of images in Matlab, including an introduction to principal components analysis via [eigenfaces](#).

- **Computer Vision:**

- [Computer Vision Homepage](#)

- [Face Recognition Homepage](#)

- [Face Detection Homepage](#)

Introductions

- **Name, year, supervisor**
- **Why do you want to take this class?**
- **What are you hoping to learn?**
